APKANI SANDEEP KUMAR

DATA ANALYST INTERN

apkanisandeep00@outlook.com | +44 78458 25863 | Greater Leeds, United Kingdom | LinkedIn | GitHub | Portfolio

SUMMARY

Career switcher with 8+ years in government administration, including extensive hands-on data management, automation, and MIS reporting - now working as a **Data Analyst Intern at Ideabean Software Technology in the UK**. Built and maintained SQL/Python - driven beneficiary databases. Proficient in Python, SQL, Tableau, and Power BI, with strong skills in statistical analysis, hypothesis testing, and data visualisation. Skilled at translating complex datasets into clear insights for non-technical stakeholders. **Based in the UK with full right to work**.

SKILLS

Languages & Databases: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, MySQL, BigQuery

Visualisation & Reporting: Tableau, Power BI, Microsoft Excel (Power Query, Pivot Tables)

Analytics: EDA, Data Wrangling, Statistical Analysis, Hypothesis Testing, A/B Testing, Customer Segmentation, Feature Engineering, ETL Pipelines

Tools: Git, GitHub, Streamlit, Jupyter Notebook

EXPERIENCE

Data Analyst Intern | Ideabean Software Technology Pvt Ltd | London, UK May 2026 – Present

- Supporting data collection, cleaning, and reporting for clients in the retail sector using SQL,Python, Excel, and Power BI.
- Assisting in building dashboards to help clients track key operational and business metrics

Agriculture Extension Officer (Data & MIS Reporting) Live Streamlit Apps Apr 2018 – Apr 2026

- Collected and digitally recorded real-time field-survey data (crop type, acreage, sowing patterns) across a 12,000-acre block via government mobile data systems, feeding directly into state-level agricultural planning and procurement decisions.
- Designed and maintained a 9,500+ record beneficiary database for Rythu Bandhu and Rythu Bheema, Farmer Registry welfare schemes using SQL, Python and Advanced Excel. Performed data wrangling, eligibility validation, deduplication, and reconciliation, analysing root-cause analysis **reducing data errors by approximately 35%**.
- Surveyed and compiled structured field reports during crop-damage events (drought, unseasonal rain, pest outbreaks), supplying the data used downstream in government compensation and insurance claim processing. Communicated data-driven findings and scheme performance visual summaries to district-level non-technical stakeholder management.

PROJECTS

UK-Retail-SQL-business-analysis GitHub

Technologies: SQL, Time Series Analysis

- Analysed 500,000+ orders from a UK-based online retail dataset to uncover insights into customer behaviour, product performance, sales trends, and revenue drivers.
- Performed cohort analysis, revenue segmentation, and time-series trend analysis to identify peak trading periods and top-performing product categories.

Walmart Black Friday Sales Analysis GitHub

Technologies: Python, NumPy, Pandas, Matplotlib, Seaborn

- Analysed 100M+ sales transactions to segment customers by demographic and purchasing behaviour, developing a targeted marketing framework to identify the highest-value revenue opportunities.

Netflix Streaming Trends EDA GitHub

Technologies: Python, NumPy, Pandas, Matplotlib, Seaborn, Data Wrangling, EDA

- Conducted end-to-end exploratory data analysis on Netflix content data to detect a structural market shift from films to TV series, providing a data-driven content investment recommendation.
